I. Overview of the Guide to Success

Purpose

For years, Sacramento City Unified has relied on Standardized Testing and Resorking (ta, Adequate Yearly Progress) (f), and Academic Performance IndexP) as the primary measure of a school's progress, with no clear way to measure district performal flow ever, feedback from teachers, principals, familie and students have emphasized that these measures alone do not capture student performance and progressor do they account for the performance and progress of district departments SCUSD has responded to this concern by developing the Guide to SGGS) so which will look at multiple measures to paint a more accurate ure of the whole child not to provide clear, measurable targets for district achievem these measures are especially relevant because they were authentically developed by the staff and community that its tisict serves. As such, he Guide to Suess provides a more comprehensive body of evidence and a more informative view of how much of an impact our schools are having on students from year to year.

Deliverables

The SCUSD Guide to Success will provide a set of qualitative and quantitative exuttesigned to reflect achievement. The overall goals of the Guide to Success are to promote continuous improvement and excellence in teaching and learning, as well as provide students with the necessary knowledge, skills, mindsets and experiences toolbege and career ready. The SacramentoCity Unified School District (SCUSDGuide to Success(GTS) will provide a set of qualitative and quantitative outcomes designed to reflect the district's department performance and a school's student achievement In SCUSID a GTSs a means to:

- Establish æommonvisiontied to data, and the creation of goals for performance and achievement that provideres ource at the right level to be st support growth and development;
- 2. Alignour organization'sprocessesinitiatives, and policies with a common vision; a primary focus that 100% of graduated eaveour system collegend career ready by 2020, such that no other initiative will detract attention or resources away from accomplishing this goal;
- 3. Set cleaexpectation and understanding of roles, responsibilities and outcomes;
- 4. Provide the tool that allows employee at all levels to continuously monitor effectiveness, efficiency and progres towards meeting achievement argets, creating a supportive system that place spersonne in positions where they can be successful whether in front of students, in leadership or support roles; and
- 5. Offer resources/opportunities ensuretime, money, personnel, and materials are allocated to meet the commonvision. Provideall necessary stakeholders with real-time modifications and resources as well as a knowledges having and gathering process that allows for best practices to be captured and replicated acrossour school district.

Product

The District Guide to Success focuses on the key areas that were riwistzed by the community:

- EffectivenessHow effective the department is in meeting the stated goal or achieving the intended outcome for its work
- Customer Service: How satisfied the "customer" is and how well does the department serves the customer neds
- Cost Efficiency: How much the department maximizes its funding

The Site Guide to Success is linked to the district's Strategic Plan:

- Career and College Readine easures how prepared a child is for college and for the work environment, focusing ograde level academic proficiency and applicatio EL skills
- EngagementMeasures more of holistic indicators of schools and is the primary place to look at factors beyond academics.
- Transformation:Measures the growth of students in the majority of metrics from Career and College Readiness; also looks at the achievement gap and cohorts of children.

II. Driving Governance

At the heart of accountability is the need to be able to answer the fundamental question: how are we doing? The district's Stragic Plan 20104 is the outline of the District's sion. The Guide to Success strategically focuses on how we can effectively measure our performance on these goals.

III. Budget

The budgethat supports the development and implementation of the Guide to Successrs professionalearning tool development and instructional materials but is largely drive by the work of volunteers Sources funding for this work (exclusive of staff time) are provided through grants

Stuart Foundation Funding	\$75,000
x Consulting and best practice advisement; development of tools	
x Materials and Supplies for the PEV work	
x Travel expenses (ex. mileage, site visits)	
In-

IV. Goals, Objectives and Measures

The district is fully committed to implementing a performance management framework designed to provide professional development tools and resources for sites and for families. The district is similarly committed to creating a system that allows departmetatransparently account for performance throughout the year, allowing for more dataven conversations linked to funding decisions and resource allocation models.

Theobjectivesof this work is twofold:

objectives

Tool Development

The Guide to Success isdevelopment as a tool. We plan to roll out the most updated information to site leaders in May, allowing them to previewetwork that has been completed to date. We are planning for completion of the tool by August 2014, with metrics being gradually included into the tool as they are available. For example, on the site Guide to Success, we will not have growth data (Transformation Pillar) until after the second year of testing on the Smarter Balanced assessment. In the interim, those metrics will be greyed out until they are functional. Similarly, many departments are collecting data on their metrics for the first time. This means that they will not have anything to inform the Guide to Success until a full year of data collection has occurred.

We also expect that the tool will need to go through beta testing which includes, but is not limited to: focus groups, data cleaning, norming on data collection, and validity testing. This is a process that will be executed next year as the implementation, hold meless year.

What we do expect to be available, on a rolling basis, will be the Departicional Family Resource Board All of these will be developed over time, with an increasingly robust and active set of materials for stakeholders to utilize.

VII. Lessons Learned/Next Steps

Although this has been a comparatively quick pession with other districts taking multiple years and larger staffs to complete the work, there are a lot of good lessons that have been leakened. lessons learned are outlined below:

- Find better ways to communicate difficult information. One of the great challenges in this work is to communicate technical information about measurement and metrics to a very diverse group of people, with varying levels of knowledge around assessments, surveys, and mandates. This created the need for many follow conversations and significantly more training for our PEVs. Streamlining this process by creating a structure of preptor access the information -and creating more simplified and direct versions to ensure conversations focus on the core of the issue will be important.
- The translation of documents dramatically impacts the work. By thinking about how this
 document would sound in different languages (and if there was even an available word for
 translating purposes) the esignteam was able to ensure that all stake were hearing
 the same information in the same way.
- Include a diverse teamin all respects. The acknowledgement that diversity included more than race and school segment was important for the development of this work. The team tried to get a representative sample in many different demographic areas. This led to a better and more comprehensive document, representative of the district.

Next steps in implementing the strict and site Guides to Successlude, but are not limited to the following:

x Complete the technical development of topite G[, iasTd <0078>4(al)10(d5)10(d)6(e)-1(v)3(e)-1(lo
